LOVELY JOY FIGUERAS

SOFTWARE ENGINEER

Pasig City, Philippines | lovelyfigueras@gmail.com | +63 9311273321 | LinkedIn | GitHub | Portfolio

SUMMARY

Software Engineer with 5 years of experience, primarily in Android development, and prior full-stack web experience. Skilled in Kotlin/Java, secure payment systems, EMV certification, REST APIs, Azure DevOps CI/CD, and production troubleshooting. Building personal web projects with React.js and TypeScript.

EXPERIENCE

Android Developer — Serino Systems, Inc.

January 2023 – Present

Kotlin, Java, JavaScript, Android, Jetpack Compose, Azure DevOps, CI/CD, EMV, Firebase Crashlytics, Agile

- Build and maintain features for production payment applications, supporting reliable, secure transaction processing for live merchant transactions.
- Implement and validate EMV certification fixes against card-brand specifications (Visa, Mastercard, and others) across multiple device vendors, ensuring compliance and successful certification audits.
- Build and automate APK build & release pipelines in Azure DevOps (automated builds and version management), reducing manual steps for the Android team.
- Investigate production issues and deliver hotfixes and feature enhancements across multiple device platforms.
- Monitor production app stability with Firebase Crashlytics, triaging crash reports and logs to investigate and resolve issues.
- Optimize multi-layered application architecture to improve transaction reliability and application stability.
- Integrate AI capabilities into production features and use GitHub Copilot and Claude Code to accelerate development.
- Collaborate with cross-functional teams on complex payment components and transaction workflows.

Junior Android Engineer — RiderKo

August 2021 – January 2023

Kotlin, REST APIs, Retrofit, MVP, Google Analytics, Facebook SDK, Agile

- Developed and maintained Android application features using Kotlin and MVP architecture.
- Integrated REST APIs with Retrofit to support transaction workflows and user data, improving reliability of data exchange across app features.
- Investigated performance issues and improved application responsiveness and reliability.
- Integrated Google Analytics and the Facebook SDK (AppEventsLogger) to track installs, purchases, and custom events for product insights.

Full-Stack Web Developer — Editmode (Remote)

February 2021 – August 2021

Ruby on Rails, JavaScript, Tailwind UI, Alpine.js, MVC, Agile

- Built responsive front-end UI components using Tailwind UI and Alpine.js.
- Developed back-end functionality with Ruby on Rails using the MVC pattern — models, controllers, routing, and server-side logic.
- Improved SEO and maintained functionality across production web systems.

TECHNICAL SKILLS

Mobile	Kotlin, Java, Android, Jetpack Compose, MVVM, MVP
Payments	EMV Certification, Secure Transaction Systems
Integration	REST APIs, Retrofit, Firebase Authentication, Firebase Crashlytics, Google Analytics
Database	Firebase Firestore, Firebase Realtime Database, PostgreSQL, Room
Web	React.js, TypeScript, Vite, Ruby on Rails, JavaScript, Tailwind CSS, Alpine.js, MVC
AI Tools	GitHub Copilot, Claude Code
CI/CD & Build Automation	Azure DevOps, GitHub Actions, GitHub Pages, Git
Methodologies	Agile Development

PROJECTS

ParkBack — Parking Spot Finder

GitHub · Live

React.js, TypeScript, Firebase Authentication, Firestore, Realtime Database, Vite

- Built a responsive serverless app for saving and finding parking spots, with anonymous authentication, location and photo support, and GitHub Pages deployment.

Baking Recipe Keeper — Android App

GitHub

Kotlin, Jetpack Compose, Material 3, MVVM + StateFlow, Room, Coroutines

- Offline-first baking recipe app with live serving & unit conversion, favorites and tags, shopping lists, a photo/video gallery, and backup & restore; shipped a signed APK release.

GWeather — Android App

GitHub

Kotlin, Jetpack Compose, MVVM, Retrofit, Room, Navigation Compose

- Real-time weather app built with Jetpack Compose and MVVM, integrating the OpenWeather API using Retrofit with location services and a locally stored history in Room; covered by unit tests.

Budgety — Budgeting Web App

GitHub · Live

JavaScript, HTML, CSS

- Budgeting app for tracking income and expenses with automatic balance and percentage calculations, built in vanilla JavaScript using the module pattern.

EDUCATION

Avion School — Full-Stack Web Development
600+ hours intensive full-stack training · 2021

EARIST — B.S. in Applied Physics (Computer Science Emphasis)
2020
